

# PIG-Assignment

**You need to do the following tasks with PIG using flights.csv**

## Task #1 (5 marks)

Write a Pig script to determine

The top 2 busiest airports based on the total number of flights departing from or arriving at each airport.

Report the airport code along with the total number of flights.

## Task #2 (5 marks)

Write a Pig script to determine

The longest flight duration (in minutes) for each unique carrier.

Report the carrier along with the longest flight duration.

## Task #3 (5 marks)

Write a Pig script to determine

Determine the day of the month with the highest number of flights.

Report the day along with the total number of flights.

## Assignment

Show how data is read into PIG and Process the above tasks along with output
